

Nousaku Wind Bells Care

To clean wipe with a soft cloth or a sponge.

Treat with diluted dishwashing detergent and lightly rub with a damp sponge/cloth if needed. Then, wipe with dry cloth.

Do not rub strongly with metal polishers or hard brush. Although they are finished with a clear coat, the colour of the metal may slightly change.

The wind catcher is made of waterproof Japanese paper 'Washi' (some are made of cotton); however, it is not perfectly waterproof. In case of heavy rain/strong wind, it is recommended that you keep them inside.

Thank you for purchasing your Nousaku Wind Bell(s) from us, we hope that you enjoy them for many years to come!

Please contact us if you need any more information.

Regards,

Anthony
